

JAI ARORA

jai.24arora@gmail.com — +91-94660-46600 — [LinkedIn](#) — [GitHub](#)

Panipat, Haryana, India

PROFILE SUMMARY

Aspiring Software Engineer with strong foundations in **Data Structures, Algorithms, OOP, DBMS, and back-end development**. Skilled in building **AI-powered, ML-based, and data-driven applications** using modern technologies. Passionate about scalable systems, problem-solving, and collaborative software engineering.

EDUCATION

B.Tech in Computer Science (AI and ML) Vellore Institute of Technology, Bhopal	08/2023 – 05/2027 CGPA: 8.80 / 10
Class 12 – CBSE , Sanatan Dharam Vidya Mandir, Panipat	04/2022 – 04/2023
Class 10 – CBSE , Sanatan Dharam Vidya Mandir, Panipat	05/2020 – 05/2021

TECHNICAL SKILLS

Languages: C, C++, Java (DSA), Python, JavaScript, SQL
Web Development: HTML, CSS, React, Node.js, Express.js, Django, Tailwind CSS
Databases: MySQL, MongoDB, SQLite, PL/SQL
Tools & Platforms: Git, GitHub, AWS, Firebase, Netlify, Postman, VS Code, Figma
Libraries/Frameworks: Pandas, TensorFlow, NLTK, Chart.js, Matplotlib, PyQt5
Core Concepts: DSA, OOP, DBMS, REST APIs, Debugging, Version Control

PROJECTS

AI Resume Analyzer GitHub: AI_Resume_Analyzer	11/2025 – 12/2025
---	--------------------------

- Built an AI-powered ATS resume analyzer using Puter AI and prompt engineering.
- Implemented PDF/text extraction and automated resume skill evaluation.
- Developed responsive React frontend with structured feedback presentation.
- Improved resume screening efficiency by generating detailed ATS-based insights.

Health Prediction App GitHub: multiple-disease-detection	01/2025 – 04/2025
--	--------------------------

- Developed ML models for predicting heart disease and diabetes risks.
- Built Flask backend APIs for handling predictions and user input processing.
- Designed intuitive web interface for seamless user interaction and result display.
- Enhanced prediction accuracy through optimized preprocessing and feature selection.

Sentiment Analyzer GitHub: Sentiment_Analyser-	09/2024 – 12/2024
--	--------------------------

- Implemented NLP-based sentiment classification using TensorFlow and NLTK.
- Integrated React frontend with Flask backend for real-time text analysis.
- Improved preprocessing and inference pipeline for faster response times.

Chemical Equipment Parameter Visualizer GitHub: Chemical_Equipment_Visualizer	02/2026 – 04/2026
---	--------------------------

- Built hybrid Web + Desktop application for analyzing chemical equipment CSV datasets.
- Developed Django REST backend powering both React and PyQt5 frontends.
- Implemented interactive charts, PDF reports, authentication, and upload history.
- Integrated data visualization tools to simplify monitoring and analysis workflows.

CERTIFICATIONS

Deloitte Virtual Internship – Cybersecurity, Technology, Data Science	06/2025
Applied Machine Learning in Python – University of Michigan	12/2025
IBM – Introduction to Artificial Intelligence	12/2023

ACHIEVEMENTS

- Solved 150+ coding problems across LeetCode and GeeksforGeeks.
- Participated in hackathons and coding contests with working project demos.
- Maintained active GitHub contributions across 6+ public repositories.
